

In this game – Kim Kollektor Viking Treasures – the player is Kim Kollektor, a young and promising archaeologist and collector of historical items, who travels around the world and Europe, following In the Footsteps of the Vikings, searching for Viking material for his collection. He gets help from his former teacher, Professor Juan Torero and from the assisting personnel. Then he arranges exhibitions in different cities, and gets income from the visitor fees. With this and other funding he then can arrange more archaeological excavations, and also acquire artifacts by direct purchases. The archaeological excavations can take place on the ground or at the sea, depending on the locality. To map the excavation areas one uses a soil radar, an echo sounder and a metal detector – as in real life. Besides that, Kim Kollektor has an imaginary Ghost Cam, which gives direct information about the Viking life and history.

The goal in the game is to accumulate the collection around Viking history, and thus gather fame. Acting in the game also consumes energy: the player has to maintain the necessary energy level by using nourishment and lodging services. Money will be spent by travelling, accommodations, equipment, nutrition – and first of all to the wages of the excavation labor force, and to organizing exhibitions plus the advertising needed.

The game presents the characteristics of real municipalities and their major tourist attractions. Different game versions cover the routes of the Vikings, including the towns and cities along them. In the first version, coasts of the Baltic Sea and the Gulf of Finland, together with the cities of the Nordic countries in general, will be in the key role.

## MOBILE GAME AND WEB PORTALS FOR PRESENTING GEOGRAPHICAL LOCATIONS IN AN INTERESTING WAY

**KIM KOLLEKTOR  
VIKING TREASURES –  
TRAVEL AND HISTORY, TOURIST  
ATTRACTI0NS AND SERVICES IN A MOBILE GAME**

**YOUR CITY/TOWN/MUNICIPALITY PRESENTED  
IN THE GAME, MOBILE AND WEB SERVICES BY  
MULTIPLE MEANS**

Your town will be presented in Kim Kollektor Viking Treasures game, using three basic ways, upon agreement:

1. As a MOBILE WEB PAGE, consisting of about ten pictures of your landmarks and tourist attractions etc. There will be a link or several links to your own, actual tourism pages on your own portal. This information can be reached not only from the game, but also using any smart phone, tablet or computer connected to the Internet.

2. As a LOCATION SCREEN in the game (or even a couple of screens), with a picture and a short textual description of one or more landmarks of your choice. There may be actual or imaginary restaurants, stores, hotels, banks and other enterprises on the page. There will be also a link to the mobile portal here. This information can be reached by the gamers using any platform version of the game developed in the future (Windows Phone, Apple iOS, Google Android, HTML5 web version), using a smart phone, tablet or computer.

3. As a 360 DEGREE PANORAMA picture in the game, as in the former case, with your town profile and pictures of your landmarks.

Besides the basic presentations it is possible to present the town, city or other municipality in many bespoke ways: as a BACKGROUND PICTURE in cartoons of the game plot, as a TOURISM VIDEO linked to the game location screen. The terms will be negotiated separately.

We'll gladly incorporate your town's historical, Viking history related and tourism attraction information AS A COMPREHENSIVE WEB PAGE with necessary links, onto our Viking history portal "In the Footsteps of the Vikings" – without any additional charge!

### Top 10 attractions in Loviisa

#### Rönnäs Archipelago Museum

The Archipelago museum showcases the history of the Itä-Uusimaa archipelago and boatbuilding. Open in summer.

#### Pernaja Church

The Medieval granite church in Pernaja is an architectural gem. Formerly known as St Michael's Church, it is in a style common in Finland and Sweden from the 13th to the 15th centuries. The splendid interior includes coats of arms of local nobility of bygone days. The beautiful contemporary stained glass windows are made by Lennart Segerstråle. The church is open during summer.

#### Loviisa Church

Built in the Neo-Gothic style, Loviisa Church was consecrated in 1865. It is called the mother of all road churches, and with good reason: you will literally come right up against it as you approach along the Helsinki road. There is a large parking lot outside the church.
